DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12, 20, and 23-31 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Calfo et al. clearly teaches the construction of a laminated flux shunt for dynamoelectric machine stator comprising:

a stator core having an radial inner surface and opposing axial ends; and
a flux shunt disposed adjacent and proximate to the radial inner surface of the stator core and one of the opposing axial ends.

The prior art of record, taken alone or in combination, fails to disclose a flux shunt for use in a power generator as claimed:

on independent claim 1, comprising a convex outer surface adapted to be disposed adjacent to a radial inner surface of the stator core, and a concave inner surface adapted to be disposed adjacent to a radial outer surface of the rotor;

on independent claim 6, comprising a flux shunt having a convex outer surface, the convex outer surface disposed adjacent to the inner surface of the stator core;

on independent claim 20, comprising a flux shunt radially disposed adjacent to the inner surface of the stator at approximately an end of the two ends of the stator; and

on independent claim 27, comprising a flux shunt having a convex outer surface being disposed adjacent to the radial inner surface of the stator core.

Dependent claims 2-5, 7-12, 23-26, and 28-31 are considered allowable by their respective dependence on independent claims 1, 6, 20 and 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
